Skills

- Python | JavaScript | React | Java | Node | Express | HTML | CSS | WordPress | Elementor | C | jQuery | NoSQL | Git
- AWS Cloud Computing | Figma | Frontend | Backend | Full-Stack

Experience

| **Front-end developer** | **Udugu Institute** | *Harare, ZW* | **11/2023 - Present** |

- UI/UX Design
- Front-end development (React, Angular, HTML, CSS and Javascript)
- Web design and hosting

| **Junior Developer Intern** | **DewCis** | *Nairobi, KE* | **05/2022 - 07/2022** |

- Contributed to the design and development of enterprise-level web applications for diverse companies, employing cutting-edge technologies such as **WordPress, Elementor, Java, CSS, and HTML**.
- Updated the DewCis webpage by skillfully employing WordPress and Elementor, enhancing its visual appeal and functionality.
- Designed and developed the frontend login portal for Proactive Flight Training School, leveraging tools like **Figma**, CSS, and HTML to ensure a seamless user experience.
- Collaborated with a team of three members to conceive and develop a P.A.Y.E (Pay As You Earn) application, utilising design tools like Figma and advanced coding languages such as **React and Java.**
- Participated in Java lessons through the CodePamoja program, bolstering my proficiency in this powerful programming language.

| **Student Life Intern** | **African Leadership University** | *Pamplemousses, MU* | **02/2021 - 06/2021** |

- Successfully planned and executed various events and campaigns, including a Sexual Health campaign, Responsible Drinking campaign, and a Medical Webinar, demonstrating strong organizational and **project management** skills.
- Collaborated with various teams to implement optimal protocols in Medical and Immigration domains, ensuring streamlined processes and compliance.
- Played a crucial role in facilitating communication and authorization between patients and caregivers, fostering a supportive and patient-centered environment.
- Drafted and documented protocols in the Medical field, ensuring clear and comprehensive record-keeping. Additionally, followed up on residential permit requests and drafted support letters in the Immigration context, showcasing strong attention to detail and administrative skills.

Education

| **Bachelor of Science** | **Glasgow Caledonian University** | *Glasgow, UK* | **09/2019 - 02/2024** |

- (Hons) Computing

Projects

- **B2C:** Developed a web application for Batanai 2 Create, providing users with company information, career updates, and a platform for proposing applications. Admin-approved submissions transition to a challenge board, fostering collaboration among developers for ideation and development strategies. The project contributes to building a dynamic creative community. **(11/2023)**
- **BRIDGE:** Designed and developed a dynamic web application at the forefront of advancing gender equality in HR hiring practices. It achieves this by removing gender bias from job postings and offering crucial salary data. **(07/2023)**
- **AGB FITNESS:** Designed and developed an innovative web application to promote a healthier lifestyle among employees by allowing them to record and track their health goals. **(05/2022)**

Languages

- **English -** Professional
- **Swahili -** Professional
- **French -** Intermediate
